DataHouseAsia Company
Binh Thuan, Hai Chau District,
Da Nang City
March 7, 2023

Dear Hiring team,

My name is Phan Thị Thu Hương. I am a sophomore at Passerelles Numériques Vietnam (PNV), which is a non-governmental organization in Vietnam. I am delighted to find out that DataHouseAsia Company is recruiting a software engineer intern through your website. I feel that my qualifications and experience make me suitable for this position. Therefore, I would like to apply for the position of Software Engineer Intern at your company.

During my study at PNV, I have absorbed and applied a lot of knowledge about Python, Java, HTML, CSS, JavaScript, PHP, MySQL, BootStrap, and Github. I have done individual and group projects using these languages. In particular, I did a team project as a leader. I created a sales website using HTML, CSS, JavaScript, and Mock API in that project. That project was rated well by my teacher and I got an 8.5. Besides, I am preparing to be taught ReacJS this March. Therefore, I guarantee that I will study seriously and apply that knowledge during the internship at the company. In addition, I regularly carry out projects to improve soft skills such as project management, teamwork, time management, and crowdfunding as a leader. I often communicate in English with volunteers from different countries around the world through PNV's English Club activities and the A Better Vietnam project.

I am sure that with my self-learning ability, perseverance, and will to progress, I will strive to become the best fit for this position. Moreover, I am a sociable, confident, responsible, and disciplined person at work, therefor I guarantee that I can complete the assigned work in the best possible way and bring much value to the company. I am convinced that serving as an intern at DataHouseAsia will be a critical step for me to apply my skills and knowledge while acquiring fundamental new tools in a challenging environment.

I am very much looking forward to having an interview with DataHouseAsia to demonstrate my competence as well as gain a deeper understanding of the company. Please find my CV enclosed for more information concerning my education and experience. If you need any further information, please contact me at 0814619859. I am available for an interview at your earliest convenience.

Thank you for considering my application. I look forward to hearing from you.

Yours sincerely,

Thu Hương

PHAN THI THU HUONG
Software Engineer Intern
